

Blanke•Heavy Duty Expansion Joint

(Brass • Aluminum • Stainless steel)

The Blanke•HD Expansion Joint, constructed with aluminum, brass or stainless steel edges filled with a non-tacky silicone sealant, helps absorb movement caused by shrinkage, structure settling, substrate expansion and contraction, and vibration. Because the sealant is cured in a factory controlled environment according to the manufacturer's specifications, and not at the construction site, the finish of the Blanke•HD Expansion Joint is consistently high quality and uniform. The Blanke•HD Expansion Joint has excellent resistance to grease, oil and cleaning chemicals.

Brass; light oak silicone

Length 8.0 feet

Pack: 1 piece
